Certain non-GAAP measures have been provided to facilitate comparison with the prior year. The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). However, management believes that non-GAAP financial measures which exclude certain non-recurring items present additional useful comparisons between current results and results in prior operating periods, providing investors with a clearer view of the underlying trends of the business; throughout our materials we refer to non-GAAP measures as "Adjusted." Management also uses these non-GAAP financial measures in making financial, operating, planning and compensation decisions and in evaluating the Company's performance. Non-GAAP financial measures, which may be inconsistent with similarly captioned measures presented by other companies, should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with GAAP.

We have provided a table on pages 9 and 10 that reconcile these non-GAAP measures to their corresponding GAAP-based measures.
